

AGROSTEMIN

SOYBEAN

Dr. Danilo Gajić

APPLICATION: twice during the season

- **first time** with seeds **30 g/ha "golden"** or **300 g/ha "green"**
- **second time** prior to flowering **300 g/ha "green"** or **30 g/ha "golden"** – foliar

Formulation		Dosing		Remark
identifier	mark	when	how much	how
powder	DS	with seed (first time), or together with an inoculant ("green fertilizer")	30 g "golden" to a planting unit *) per ha 300 g "green" to a planting unit *) per ha	apply directly to the seed by hand or in a drum or indirectly, together with an inoculant ("green fertilizer") immediately before seeding, if there is planed to inoculate
		10 days upon flowering (second time)	30g "gold" or 300g "green" dissolved in water per one ha of cultivated land	to dissolve 300g "green" into 4 to 5 liters, i.e. 30g "gold" into 1.5 to 2 liters of warm water which is to be divided to number of tanks necessary for spraying one ha of cultivated land
concentrated water suspension for the treatment of seed	FS, SC	with seed (first time)	0.25 l to a planting unit *) per ha	it is used exclusively in industrial seed finishing centers <u>upon request **</u>

Recommendation: in other terms to spray simultaneously with application of other chemical protection preparations with 150 g/ha "green" (or 15g/ha "gold") for more successful recovery.

increased yield from 5 to 20% and oil content

- greater leaf area with more chlorophyll
- improved seed vigor
- higher plants with much more pods
- longer and more ramified root
- better exchange of nutritive substances (nutrition)
- improves resistance to climate, pests and diseases

COMPLETELY HARMLESS FOR PEOPLE, ANIMALS (INCLUDING BEES) AND ENVIRONMENT;
IT DOES NOT REQUIRE SPECIAL MEASURES OF HYGIENIC AND TECHNICAL PROTECTION ***)

Ministry of Agriculture, Forestry and Water Management of the Republic of Serbia
Decision № 321-01-01175/2009-11 dated February 08, 2010

*) planned quantity of seed to be sown per one ha

**) for details please contact the distributor – time of delivery is 7 days

***) Decision № 3/2-08-9291/02 dated 13.01.03 of Ministry of Labor, healthcare and social welfare of Federal Republic of Yugoslavia

AGROSTEMIN

APPLICATION

Dr. Danica Gajic

- soybean -

(within seeding activities, separately or together with other preparations;
or on demand in processing center)

- faster and more uniform germination
- improved uptake of water and mineral
- improved resistance to pests and diseases
- increased content of oil, total yield of raw oil and raw proteins
- plants are in better condition: better stand to climate extremes (moisture / drought)
- higher and more vigorous with larger leaves
- more numerous clusters and pods
- higher yield: from 5 to 20%

**INCREASED YIELD FROM 10 TO 20%-INCREASES THE QUALITY CATEGORY OF YIELD
(increased content of oil)**

Application: as per regulations, **300 g/ha "green"** (or **30 g/ha "golden"**), **twice** during the season.

First time: mix either with an inoculant ("green fertilizer") or directly with seed as powder, particularly, foliar to spray in stage of 2–4 leaves.

Second time: spray 10 days prior to flowering, dividing a dissolved quantity of powder to a previously prepared solution of other preparations for treatment of one ha (it does not require a separate entrance), more precisely, to a quantity of water necessary for **spraying of one ha**.

Recommendation:

In other terms to spray simultaneously with application of other chemical protection preparations with 150 g/ha "green" (or 15g/ha "gold") for more successful recovery.

*COMPLETELY HARMLESS FOR PEOPLE, ANIMALS (INCLUDING BEES) AND ENVIRONMENT;
IT DOES NOT REQUIRE SPECIAL MEASURES OF HYGIENIC AND TECHNICAL PROTECTION **

Dr Danica Gajic invents Agrostemin. As a unique preparation (it is neither a fertilizer, it is neither a pesticide, nor a phytohormone) with wide range of effects, based on researches, testings and verifications done by Scientific institutions and eminent scientists and based on proven effects in application, **AGROSTEMIN®** over 30 years of application in the agriculture in Yugoslavia has been classified as a standard agrotechnical measure, i.e. **a preparation for improving the quality and increasing quantity of yield****).

AGROSTEMIN® is produced as per the Yugoslav Patent office document no. 32749. Considering the fact that there are also forgeries present on the market, with quality control we obtained the right to put the signature (*Dr. Danica Gajic*) of the author-creator of Agrostemin – Dr Danica Gajic – on our packagings and, in such a way, to confirm their originality.
